EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Independent claims 59, 66, 73, 81, and 83 are allowable because the prior art of record does not disclose or reasonably suggest a distributed voice interface, where a transceiver receives input from a device that performs preliminary signal processing and keyword detection, the transceiver performing speech recognition based on stored acoustic models, the transceiver being configured to transmit data to the device by a high bandwidth communication channel supporting audio or video at the device and a low bandwidth communication channel supporting control signals for operation of a primary functionality component, wherein the data comprises audio data generated to be consistent with audio data generated by the device based on the type of device.

Applicants' Specification, Paged 24, Line 12 to Page 25, Line 5, discloses that messages or prompts output by voice user interface 62 of remote system 12 and voice user interface 34 of local device 14 can be made consistent so that messages or prompts output can be generated in a same synthesized artificial voice to deliver a seamless interactive interface to the user, and that multiple instances of a voice user interface may be used based on the type of local device. *Jacobs et al.* does not appear to disclose generating audio data transmitted by a communications center to a portable telephone. Moreover, even if the prior art taught transmission of synthesized speech from a remote system to a local device, the prior art of record does not disclose or reasonably suggest that audio data generated by a transceiver of a remote system is

consistent with audio data generated by a local device based on a type of local device. Conceivably, a local device could generate synthesized speech that did not sound the same as synthesized speech from a remote system for any given local device.

Any comments considered necessary by Applicants must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance.

CORRECTION OF INVENTORSHIP

A Petition to Correct Inventorship was filed on 22 January 2002. It was found that this nonprovisional application, as filed, through error and without deceptive intent, improperly set forth the inventorship, and accordingly, this application has been corrected in compliance with 37 CFR §1.48(a). The inventorship of this application has been changed by addition of inventors Kevin J. Surace and Steven Markman.
